WELCOME TO YOUR CAREER ORIENTATION!

When does it take place?
From now until the end of your school years.

How does it work?
You will complete a potential analysis, various practical experiences, training (e.g., for applications), and counseling.
You will always prepare for these activities first and follow up on them later. Your Career Choice Pass will help you with this!

What does it do for you?
By the end of your school years, you will know what you can and want to do!

What is the Career Choice Pass?
The Career Choice Pass is a folder with worksheets and methods that you can use to prepare, evaluate, and document your new experiences. It is your very personal folder, and over the years you will have collected your important insights, developmental steps, and proof of experiences here.

What are the benefits of the career choice folder?
An overview of yourself, your knowledge, focus areas, goals, and much more. In addition, you collect all your documents and certificates in it, so that you have everything right at hand during the application phase.

How is this folder structured?

1. **My Toolbox**
   - Your very personal area!
2. **Worksheets and methods for the preparation and follow-up of your experiences**
   - In the potential analysis
   - In the practical phases
   - During the transition to the phase after your school years
3. **My Documents**
   - This is your collection folder for important certificates and documents
4. **Summary Booklet**
   - Here you document the results of your career orientation

Have fun trying it out, and let's go!

YOUR PATH INTO THE PROFESSIONAL FUTURE

The following overview shows you steps that are important on your path to a career. Your school offers relevant programs and events for each step. Find out: What is done and how? When do these steps take place at your school? Show the overview to your parents as well and talk to them about it.

The process of career orientation in Secondary Level I

My Potential - from 8th grade

You will find out your strengths and interests. You will assess yourself and have others assess you. You will think about how you can develop further. Counseling services will help you with this.

My Career Fields - from 8th grade

You will explore careers and visit companies for this purpose. You will interview the people who work there and observe what they do and how. You can participate in Girls' Day or Boys' Day. Counseling services will help you during the career field explorations.

My Internships - from 9th grade

You will decide which careers suit you. Counseling services will help you, for example, with your career counselor. You will get to know these careers over a longer period of time in a company. Your experiences will help you decide how you can develop further.

My Transition - Graduation Class

You will check how your profile has changed. You will apply for an apprenticeship that suits you and whose requirements you meet. Or you will transition to Secondary Level II. Counseling services will help you with this, for example in the Career Information Center and at your school.
